Subject: Re: Bown Stone Products, Flower Patch Quarry (m0390019)

OK, please bond operator for \$10,000 reclamation. We need to monitor the disturbance at this site very closely since the surface is privately owned. Thanks, JB

John, Attached is our best efforts at coming up with a detailed bond amount. Since this is a small mine permit details about the mining and reclamation plans are not required.
Susan

Susan,

Could you please send me a copy of the detailed bond estimate.

Thanks,

>>> Lynn Kunzler 7/14/2006 11:31 AM >>>

John - I sent you the following message yesterday - I guess you are out. As a follow-up to a voice message I just left you,
I will be gone for the next 2 weeks, Mr. Bown would like to get his approval soon. If you can respond to this email to Susan White, she will take care of this task while I am out.

Thanks. Lynn

This is a small mining operation south of Mayfield, Utah that will disturb about 5 acres. Bown Stone Products (Jerome Bown) is the operator and SITLA mineral lease holder. The surface owner is Mr. Wilden. The site is currently active with the ground already disturbed.

The Division is ready to approve this permit, however as per our MOU with SITLA, we need your concurrence on the surety amount. The reclamation cost has been calculated to be \$10,000 (with a 3 year escalation which is what we typically use for a small mine.)

If you concur with this amount, please respond to this EMAIL so that we can finalize our permit.

Please call if you have any questions or need further clarification
